### **About the recommendation**

**process:** The Better Schools Kentucky Committee of JCTA examines each candidate's support of public education. This committee, whose members are comprised of teachers, evaluates incumbents' voting records on public education issues and reviews candidates' answers to questions on education issues. After considering all of this information, the committee recommends candidates who are strong advocates for children, teachers and public education; candidates who will listen to the concerns of classroom teachers; and candidates who feel, as we do, that teachers and public schools are important.
